PRESIDENT'S MESSAGE

Having been a member of Riesentoter Region of P.C.A. for the past six years I recently stopped to reflect as to why I joined and more importantly, why I have stayed active.

When I bought my car I did not realize that a club existed. Having some service done at Holberts I met a member and he explained what the club did but never talked about its purpose. In my six years of membership no one has. I feel its time has come.....

In simple terms I believe this club has only one purpose and that is FUN. True, we have banded together under the " Marque" of an exceptional automobile and much of the fun takes the shape of working on, racing with, or talking about the Car. As we come together for love of the Giant Killer (that's what Riesentoter means) we make social contacts, grow friendships, and have pleasant associations with a great number of people. Many of us are of different backgrounds yet this club is one of the most homogeneous groups I have ever been a member of.

FUN is a cumulative reaction, the more the merrier has been an expression through the ages.... It applies to us. The more people at an event the more people there are to talk to, and laugh with and compete against. It is never too funny to tell a joke to yourself. So.... come out and be a part of the fun!

There are two ways to be a contributor, one as a giver and the other as a receiver. If you do both, as the famous ad simply states, YOU WILL DOUBLE YOUR PLEASURE AND DOUBLE YOUR FUN!

A handwritten signature in black ink, appearing to read "Rich".

356 REGISTRY

Vern Lyle

Jerry Keyser, Publisher and Editor
2525 English Road, P. O. Box 7845
Columbus, Ohio 43207

This is a bi-monthly magazine for the exchange of ideas, experiences and information on keeping the 356 alive. Dues of \$10/year may sound high, but a wealth of information is available. It is not a club, per se, since there are no regular meetings and such, but there is a Tech Editor, Membership Chairman and all that--volunteers who love the 356 the same as you and I.

The Registry is just a year old, but last Labor Day, a 356 Holiday was held in Illinois, a kind of mini-Parade. Some outta sight 356's showed up and the parts swap meet was supposed to be something else. Send Jerry \$10, you'll dig it.

This month has really been busy, with working on the house, three engineering courses, and tons of snow. But snow is good for skiing, and you can ski with the Riesentoters on the 28th of this month.

We need cover art -- either photos (black and white prints only) or sketches. If you would like to see your work in print, please send it to me. Don't forget the 1976 Photography Contest while you're at it. Details were in last month's Der Gasser on page 12.

Now that I'm out in the sticks, I could really use some help with the newsletter. I'm home Monday nights if you want to give me a call. Written contributions would be appreciated as well.

For those inclined toward winter sprinting, there are four of them in the next six weekends, with more yet to come. Villanova University Sports Car Club events are held on Sundays...rain, snow, fog, sun or earthquake, so I'm told.

Nickel Night at Nick's is coming up on March 27, and the house really pays! Try to be at the blackjack table when Bob Russo is dealing.

Auf wiedersehen!

WE GET LETTERS...

Bob-----

My wife, Kim and I met you at a BMC Sprint in late spring. Mentioning the car may help you remember. We drove the silver 911 Targa. Well, I had these photos of you and no way to get them to you -- until we joined PCA. Since joining in the summer, I have become Secretary-Treasurer and Kim, the newsletter editor for 1976 for our region.

I have a request of you. As you may or may not know, our membership is small. I had some parts that I offered for sale. Some members purchased some of them, and I have some accessories left. If you could include them in your "For Sale" column of your next newsletter it would be greatly appreciated. Any time we can extend this service to you, please don't hesitate to contact us. Thanks loads!!

Sincerely,

Mr. & Mrs. John Grabowski

7 Clipper Court

Newark, DE 19702

(Ed. note: The items mentioned above are in the CLASSIFIED column on pages 17 - 18. We are glad to extend this service to neighboring regions at no cost, with the hope that the same privilege will be extended to us. And thanks for the pictures!)

AIR POLLUTION

The entire nation has been stampeded into a massive, multi-billion-dollar program to reduce the three major auto pollutants -- hydrocarbons, oxides of nitrogen and carbon monoxide. But scientists are just now finding that about 94% of the total world production of these pollutants actually come from nature.

Neither the auto companies nor the pollution scientists are yet saying that the government's control program is a gigantic mistake. The automotive-type pollution is concentrated in the metropolitan areas where the people and the cars are. This is especially true of carbon monoxide.

However, the growing awareness of the vast volumes of naturally-produced automotive-type emissions has sent some tremors through the pollution-control establishment. In contrast to the feeling that carbon monoxide, if it is a problem, is definitely related to cars, there are growing suspicions that the other auto-related pollution problem, photochemical smog or oxidant, could very well be caused in large measure by the natural sources.

An important fact about this situation is that many researchers both in and out of government are now finding large quantities of the oxidants in rural areas and remote areas, far from the large cities and their car concentrations.
